

Fort Bend ISD Action Research Proposal Form

Fort Bend ISD has an exciting project to engage the intellect and discover the most effective professional practices of our teachers and administrators in a wide variety of areas. Individuals or teams (up to four people) may submit action research proposals on any topic, provided that the focus of the project includes student achievement and professional practices. All grade levels, all programs, and all subjects will be considered. The definition of “student achievement” may include state assessments but may also include district, school, and teacher-created assessments.

Instructions: Please either copy and paste this form into the body of an email or attach the file to submit the information electronically to the following email address:
Yuping.Anselm@fortbend.k12.tx.us

The deadline for submission is: Oct. 12, 2009

Please type or print. Please fill in information below and add spaces as needed.

Part I. Contact Information

1. Primary contact:

Name: _____ **School or Department:** _____
Job Title: _____
Telephone No: _____ **Email :** _____

2. Additional Team Members:

Name: _____ **School or Department:** _____
Job Title: _____
Telephone No: _____ **Email :** _____

Part II. Research Questions

What question will your action research project consider? Please note that an effective research project must include specific references to student achievement and professional practices. We encourage creativity from a broad range of fields and grade levels.

Part III. Student Population to be Observed

Grade levels: _____

Special characteristics, if any: _____

Subjects: _____

Additional information about the student population:

Part IV. Data Sources (student achievement or others) to Be Gathered

(Please link the data sources with your research questions. i.e. Research question 1: students' semester grade, TAKS scale score, etc. Research question 2: rubric-rating teacher observations, etc.)

Part V. Professional Practices to Be Observed

Please specify your instructional strategy or professional practice you are going to use for your action research project. Please describe in detail what the instructional strategy targets and your rationale for using it.

Part VI. Additional Information

Here please provide any additional information about your project and yourself, including your years of teaching experience, research experience, and why you are interested in this topic.

Part VII. Support, Permission, or Resources Required

Is your supervisor aware of your project? Yes/No (Please circle one).

Please list any special administrative support and resources required in order to complete this project.
